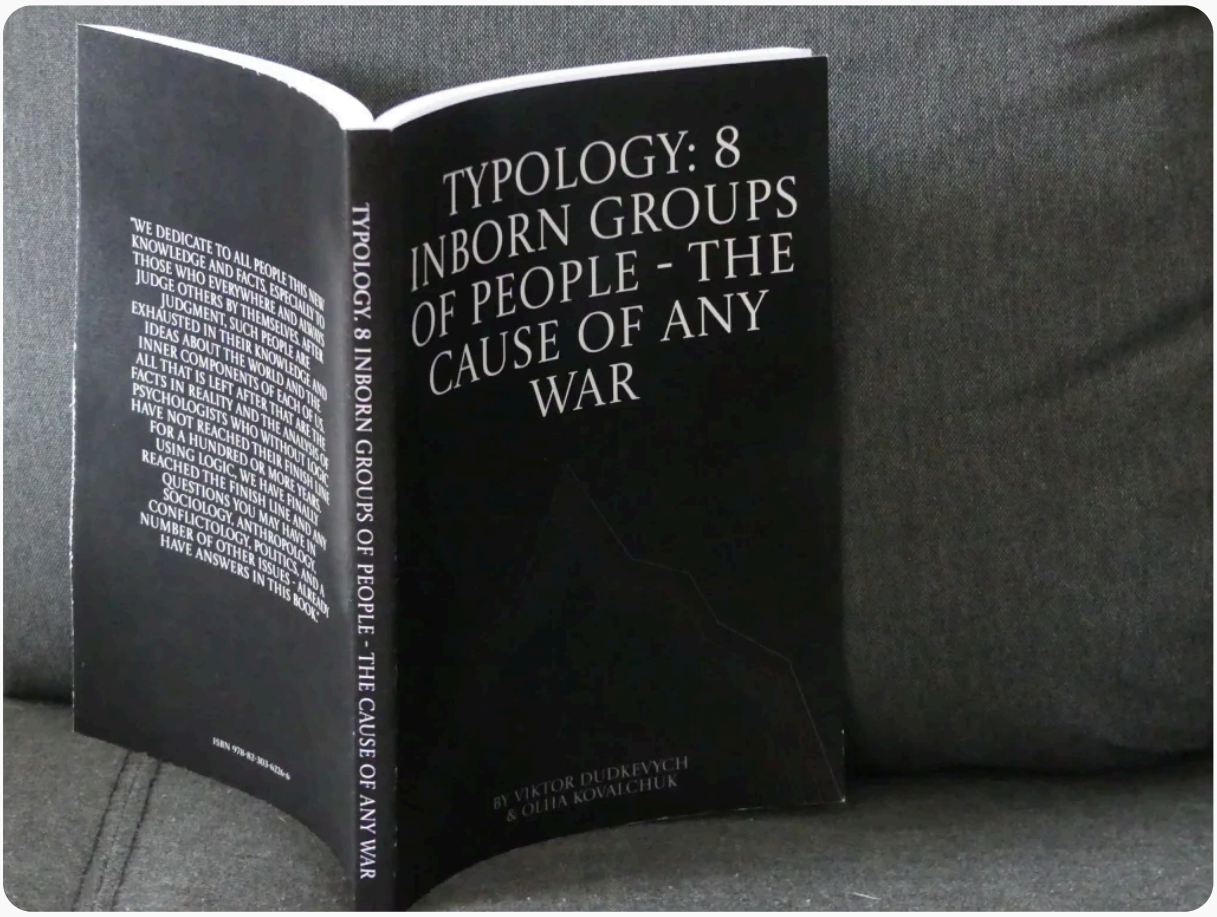
Typology. 8 Inborn Groups Of People – The Cause Of Any War

October 31, 2023



This book on the 8 inborn groups of people is our newest book and with the latest regularities we have discovered in recent years.

The relationships of the 8 inborn groups of people are the most critical relationships for each person's destiny

Repetitive complaints, conflicts, pressure and misunderstandings in relationships are all regularities associated with the 8 group relationship and they are described in this book in their entirety, along with the patterns in details.

Historically, these attitudes have always repeated themselves and a portrait of such groups of people, their tastes, interests, political ideology and beyond are all you will find in this book. How did these groups of people arise? What do they like? What do they think about? What kind of nature and geographical places they would prefer? And a bit of historical facts – read about it in this book.

Psychology will not help you with repetitive relationships, but typology will

Because for hundreds of years, no psychologist has been able to stop wars, discrimination and crime. Guess why? Because they don't know about the existence of innate groups and personalities and it is not the scope of their work. But that is what directly affects the life and our destiny and it is much more important for all of us.

And surely some of you have acquaintances or relatives that you don't like. Or on the contrary, they don't like you and every time you come into contact with them you face repeated misunderstandings. This is what affects people and it is due to the fact that each of us belongs only to one of the 8 innate groups. And they are different. Therefore it is only in this book that you will be able to explore this question. Nowhere else.
